

11 Park Drive, Suite 12
Boston, MA 02215

Additional Antibody Service

We also provide additional services to evaluate the application of antibodies on Western blotting, and Immunohistochemistry (paraffin or frozen sections) on normal and disease tissues.

Validation of Non-characterized Antibody:

Catalog Number	Validation Type	Service Content	Price
AP301	Western analysis (endogenous detection in a mammalian cell line)	The customer will choose the cell line or provide the specific cells.	\$150
AP302	Immunohistochemistry analysis	Using a paraffin-embedded normal or tumor tissue selected by the customer: antibody's specification and sensitivity (up to 6 tissue samples).	\$90/paraffin section
AP303	Immunohistochemistry analysis	Using a frozen normal or tumor tissue selected by the customer: antibody's specification and sensitivity (up to 6 tissue samples).	\$120/frozen section
