Anti-human TIE-1 (Cl. 6F12)

ORDERING INFORMATION

Catalog Number:	101-M48
Size:	10ug
Host Species:	Mouse
Antigen:	Recombinant human soluble TIE-1 protein
Purification:	Protein G Chromatography
Stabilizer:	None
Buffer:	PBS pH 7.4 w/o preservative
Formulation:	Lyophilized

Description:

Monoclonals were produced with the help of BALB/c mice using recombinant human soluble extracellular TIE-1 as the immunizing antigen. Mouse IgG, antibody (#6F12) from hybridomas was purified from cell culture supernatant by Protein G chromatography.

Reconstitution:

When reconstituted in sterile water to a concentration of 1.0 mg/ml the antibody is stable for at least six weeks at 2-4°C.

Stability:

The lyophilized antibody, though stable at room temperature, is best stored desiccated below 0°C. Reconstituted anti-TIE-1 is stable at 4°C for >one month or can be stored in working aliquots at 20°C for more than six months.

Specificity :

The monoclonal antibody will detect native human TIE-1 in ELISA experiments and on the surface of different human cell types. The antibody can be used for ELISA experiments and Western blotting.

Applications:

ELISA:	Use at 1-15 ug/ml
Western Blotting:	Use at 1-2 ug/ml

Optimal dilutions should be determined by each laboratory for each application.

The listed dilutions are for recommendation only and the final conditions should be optimized by the end users!

This product is sold for Research Use Only !
