Mouse anti-human leukemia inhibitory factor (LIF)

ORDERING INFORMATION

Catalog No: hAP-0454
Size: 100 µg
Storage: < -20° C
Immunogen: Human recombinant LIF
Ig Type: mouse IgG2
Clone: MM0454-6H31
Applications: WB and Neutralization

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with **human recombinant protein of LIF**).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 200 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody was selected for its ability to specifically detect human LIF.

Applications:

- | | | | |
|----|-----------------------------------|-----|------------|
| 1. | IHC (paraffin) | Yes | (1:20-100) |
| 2. | Neutralization of LIF bioactivity | Yes | |

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only
