

Pericyte Growth Medium (Ready to use)
ORDERING INFORMATION

Product Name	Pericyte Growth Medium (PGM)
Catalog No:	cAP-09
Size:	500ml
Storage:	4°C (in dark)

Description

Pericyte growth medium (PGM) is consisted of Pericyte Basal Medium and Pericyte growth supplements (including fetal bovine serum, growth factors). Due to the nature of those elements, certain level of lot-to-lot variability is unavoidable. Each lot of this product is tested by culturing human pericytes to ensure its full activity and sterility (This product contains antibiotics: penicillin and streptomycin).

Shipping Condition: Ambient temperature (blue ice, seasonally)

Storage Condition: The PGM should be stored at 4°C. A change in color or appearance of precipitate may indicate deterioration.

Shelf Life: 2 months from the date of receiving the product if stored under proper condition.

Notes for Use of PGMedium for culturing human pericytes:

1. Before using, transfer just required amount (ml) of PGM for your experiment from the original bottle and prewarm it to 37°C in a water bath or an incubator (Avoid frequent temperature change to the entire bottle of medium).
2. We recommend changing medium every 2 days for regular cell culture.

THESE PRODUCTS ARE FOR RESEARCH USE ONLY

Caution: Handling human and animal tissue derived products is potentially bio-hazardous. Although each cell strain is tested negative for HIV, HBV and HCV DNA, or pathogens, diagnostic tests are not necessarily 100% accurate; therefore proper precautions must be taken to avoid inadvertent exposure. Always wear gloves and safety glasses when working with these materials. Never mouth pipette. We recommend following the universal procedures for handling products of human origin as the minimum precaution against contamination.
