

Polyclonal Sheep anti Mouse IL-17B

ORDERING INFORMATION

Catalog Number:	mAP-5229
Size:	50 µg
Storage:	< -20 °C
Immunogen:	E. coli-derived recombinant human IL-17B
Ig Type:	IgG
Purification:	Antigen Affinity Purified
Applications:	WB FC N/B

Preparation:

This antibody was produced from a sheep immunized with purified human IL-17B protein.

Formulation and Storage:

The IgG fraction of immunized serum was purified by antigen affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution:

Reconstitute the antibody with 100 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 °C for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity:

Detects mouse IL-17B in ELISAs and Western blots. In sandwich immunoassays, approximately 40% cross-reactivity with recombinant human IL-17B is observed and less than 0.3% cross-reactivity with recombinant mouse (rm) IL-17, rmIL-17C, rmIL-17D, rmIL-17E, and rmIL-17F is observed.

Applications:

WB	Yes	1 : 1000 - 2000
N / B	Yes	
FC	Yes	

Optimal dilutions should be determined by each laboratory for each application.

The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users!
