Mouse Monoclonal anti human DPPII

ORDERING INFORMATION

Catalog No: hAP-0717
Size: 100µg
Storage: <-20°C
Immunogen: Recombinant human DPPII
Ig Type: Mouse IgG2
Clone: MM0717-25T60
Applications: WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with recombinant human DPPII).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human DPPII in direct ELISA and WB. In direct ELISAs and Western blots, no cross reactivity with recombinant human DPP5 is observed.

Applications:

- | | | | |
|----|----|-----|------------|
| 1. | WB | Yes | 1:500-2000 |
| 2. | IP | Yes | |

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
