

## Mouse Monoclonal anti Human HSP20

### ORDERING INFORMATION

<b>Catalog No:</b>	<b>hAP-1020</b>
<b>Size:</b>	<b>100µg</b>
<b>Storage:</b>	<b>&lt;-20°C</b>
<b>Immunogen:</b>	<b>Recombinant human HSP20</b>
<b>Ig Type:</b>	<b>Mouse IgG1</b>
<b>Clone:</b>	<b>MM1020-7W34</b>
<b>Applications:</b>	<b>WB</b>

**Preparation:** This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human HSP20 (Heat shock protein 20kDa). HSP20 is also called heat shock protein, alpha-crystallin-related, B6 (HSPB6) and is a 160 amino acid and 20 kDa member of the small heat shock protein family.

**Formulation and Storage:** The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

**Reconstitution:** Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

**Specificity:** This antibody recognizes human HSP20 in direct ELISAs and WBs. It cross reacts with mouse and rat HSP20 in WBs.

### **Applications:**

1.	WB	Yes	1:1000-2000
----	----	-----	-------------

**Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
