

Mouse Monoclonal Antibody to PDE1B

Catalogue Number	sAP-0974
Target Molecule	Name: PDE1B Aliases: PDE1B1; PDES1B MW: 61.4kDa Entrez Gene ID: 5153
Description	The protein encoded by this gene belongs to the cyclic nucleotide phosphodiesterase (PDE) family, and PDE1 subfamily. Members of the PDE1 family are calmodulin-dependent PDEs that are stimulated by a calcium-calmodulin complex. This PDE has dual-specificity for the second messengers, cAMP and cGMP, with a preference for cGMP as a substrate. cAMP and cGMP function as key regulators of many important physiological processes. Alternatively spliced transcript variants encoding different isoforms have been described for this gene. ; ;
